LIVE PROJECTS

1. EyeOnTask

Website: https://www.eyeontask.com/

Duration: 6+ Years

Domain: SaaS – Field Service Management (FSM)

About:

EyeOnTask is a cloud-based Field Service Management software used by service businesses

(plumbing, electrical, cleaning, HVAC, pest control, etc.) to manage jobs, field staff, schedules, invoices, tracking, and customer feedback.

My Role & Responsibilities:

- Built and enhanced multiple Angular front-end modules.

- Developed responsive, mobile-friendly UI for different user roles.

- Integrated REST APIs for job scheduling, user management, invoicing, reporting, and tracking.

- Created reusable components such as dialogs, modals, date pickers, and UI widgets.

- Implemented role-based access, dashboards, and data-driven UI workflows.

- Worked with Angular concepts: Components, DI, Data Binding, Directives, RxJS, Routing, Lazy Loading, Angular Material, and NgRx.

- Improved UI performance, fixed bugs, and worked on real-time data integrations.

DFWeb – https://thedfapp.com/v2/#/dashboard

Dashboard UI improvements, responsive layouts, API-driven components.

MVPnBeyond – https://mvpnbeyond.com/

Built interactive UI components, API integration, and mobile optimization.

TalkOnTask – https://www.talkontask.com/

Worked on chat UI, improved layout, and enhanced usability.

Malaika Kids – https://malaika-kids-org.dev.ucodia.com/

Developed modern UI layouts, integrated CMS content, optimized performance, and ensured accessibility.

HeyJonDoe (Angular 19) – https://app.heyjondoe.com/#/login

Developed the complete UI with routing, reactive forms, API integration, and full mobile-responsive layouts, managing the entire project lifecycle independently from setup to final client handover.

DECLARATION:-

I hereby declare that all the information given by me is true to the best of my knowledge.
Thank you
